Membership meetings are the
4th Tuesday of the month, unless noted
Bring your used toner & ink cartridges,
or old cell phones to the meetings.
Barbara Garriel will donate them to a green recycle program, Recycle4Education to benefit the
Wolf Conservation Center.
Join us on the friendly walks.

International Coastal Cleanup
Saturday, Sept 19
10 am - 12 pm
Garvies Point Preserve Beach, Glen Cove

Volunteers are welcome to join us for a live animal program and light refreshments following the cleanup. Join volunteers in 80 countries around the world to provide data on what’s in the water. Wear sneakers, bring hat & sunblock.
Call 571-8010 for information

February 23rd, 2016
Sparrows and allies in the NYC Area
Joe Giunta
Mr. Giunta has been an avid birder in the NY region for over 25 years. He is the birding instructor for the Brooklyn Botanic Garden and walk leader for many organizations including Nature Conservancy, NYC Audubon and Brooklyn Bird Club. He is the owner of Happy Warblers LLC, a birding and educational travel company. Joe will try to demystify these birds and their similar looking migration sparrow looking species for us.

October 27th, 2015
A Year in the Life of a Bird Photographer
David Speiser
Mr. Speiser has been a birder and photographer for over 15 years. He has traveled all over the world and has seen over 4,000 species of birds. His images have been featured at the Central Park Zoo, Audubon Magazine, NY Times to name a few and on a US Postage stamp! He serves as the Executive Vice-President of NYC Audubon and as a board member of Save The Frogs.

November 24th, 2015
Preserving Plum Island for Future Generations
Chris Cryder
Mr. Cryder is the Special Projects Coordinator of Save the Sound. He is currently the Outreach Coordinator for the Preserve Plum Island Coalition. He will inform us on the past, present and future of this important island.

December: No Meeting, Christmas Bird Count

January 26th, 2016
FILM Winged Seduction, Birds of Paradise
A National Geographic presentation
National Geographic photographer Tim Laman and ornithologist Ed Scholes takes us on their journey to the jungles of New Guinea allowing us to view up close and personal the trials and tribulations of capturing for the first time on film many Birds of Paradise and their behaviors. You will feel as though you are right there with them (without the bugs, of course).

Thank You Whole Foods
for generously supplying the refreshments at our general meetings.
Whole Foods is located at Northern Blvd. and Port Washington Blvd.
Amazing Piping Plover Success at Sands Point Beaches
Peggy Maslow and Jennifer Wilson-Pines

A May 2nd NY Times Op-Ed article by Deborah Kramer bemoaned the fact that “migrating shorebirds are in steep decline.” But she added, “We can help.”

On Long Island, volunteers and employees of AudubonNY, US Fish and Wildlife, DEC and Nature Conservancy are all involved in trying to help piping plover adults have young that survive. This year was successful at Sands Point beaches where Peggy Maslow witnessed a 100% success rate of piping plover young fledging after hatching. She has been monitoring piping plover young at two beaches, Half Moon Beach and Prospect Point beach in Sands Point, for eight years as a volunteer. Working out of TR Bird Sanctuary, AudubonNY’s employees, Long Island Bird Conservation Manager Amanda Pachomski and technician Suzanne Jensen, supervise Peggy and also monitor the piping plovers.

At both beaches Suzanne Jensen put up an “exclosure” to protect the four eggs laid with the help of Port Washington resident, Anne Codey. At Prospect Point, at Hempstead Harbor, all four young piping plovers fledged about the first week of July, which means that they are considered survivors. August 2 on Half Moon Beach, which is on the LI Sound, the four young piping plovers flew. That means all eight plovers born on the two beaches survived.

Most of the time we have only one or two survivors each year. Eight survivors is amazing. Peggy remembers one year she heard that only one piping plover chick survived at Jamaica Bay from 19 pairs. There are many predators such as great black-backed gulls and sometimes very high tides can wipe out the nests. Fewer than 600 piping plover pairs exist on the United States East coast. At Cape Hatteras National Seashore only 2 piping plover chicks fledged this year, the worst number since 2004. One of the dangers to young piping plover there are off-road vehicles driven by people who don’t want to share the beach with nesting birds.

Another first, five pairs of Double-crested cormorants nested atop pilings adjacent to Manorhaven Beach Park. An additional success story is a small colony of Common Terns, which despite the name are listed as threatened by New York State. Four pairs have nested on a work raft in Manhasset Bay. The owner of the raft, Capt. Matt Meyron, leaves the raft undisturbed while the terns are nesting. This year, 2 chicks were seen and photographed. It was a very good year for baby birds all around; at least eight osprey nests in Manhasset Bay produced fledged young.

CAR HITS OSPREY ROOST IN BAYVILLE
By Lindy Nielsen

For the past few years in Bayville, a pair of Ospreys has nested on a tall pole with a platform located outside of Stehli Beach on a very sharp turn. Each year they successfully rear two to three chicks.

On the night of July 1st 2015, a car travelling at a high speed failed to negotiate this turn and slammed into the pole, splitting it in half. This caused the platform to tumble down onto the side of the road with the three six-week old chicks. It is believed the parents were close by at a roost site. They took to the air and flew overhead calling in high pitched whistles.

When the firemen arrived they realized that they needed an expert to attend to the 3 chicks, so Jim Jones, a resident of Bayville, trained avian rescuer and past President of Volunteers for Wildlife, was called. He found one chick was found dead on impact, and the other two were rushed to Bailey Arboretum where Volunteers for Wildlife’s headquarters are located. Overnight another chick died from its injuries, leaving the remaining chick to be examined the next day by a vet. That third chick was found to have a broken right wing, which was immobilized and is now being cared for by the volunteers, who are giving it antibiotics and pain killers.

It was reported that within a day or two that the parents had already begun to re-build a nest on an adjacent electrical pole. This prompted PSEG-LI to hastily erect another pole and platform. As of this writing, both parents remain in the area.

The future of the remaining chick will be decided once the wing has healed completely. One scenario would be to release the chick back into the wild, hopefully before the parents migrate. If that is not successful, then a Wildlife organization would have to be found which can house the chick permanently. I was informed by a volunteer that Ospreys are not a species that do too well in captivity. It remains to be determined what cause of action will be taken.
Fall Winter 2015 BIRD WALK SCHEDULE

Walks are for beginners and experienced birders alike. Weather permitting, walks start at 9:30am unless noted. If the weather is doubtful, please call the trip leader. Area code is 516 unless noted. Go to our website at http://www.northshoreaudubon.org for directions. Think Green! We encourage carpooling where possible.

The For The Birds Program!

The Theodore Roosevelt Audubon Center and Sanctuary in Oyster Bay is looking for some terrific people to assist their instructors with educating students about birds. TRAC will offer you free training (it’s easy!) and a looseleaf binder with the actual program full of exciting ideas. They provide everything and are the main instructors. You assist as a leader while small groups of children rotate to you each 10 minutes. You decide how much time you can volunteer. It is a wonderful program and opens the eyes of students who rarely get outside. You would be amazed how excited they get on their first bird walk around their school and start to identify blue jays, cardinals and sparrows. Come join the fun! Contact Educational Director of For the Birds, Diana N. at 516-922-3200.
Theodore Roosevelt Sanctuary
134 Cove Rd., Oyster Bay  (516) 922-3200
http://ny.audubon.org/TRSanctuary
Theodore Roosevelt Sanctuary was founded in 1923. Today, through high-quality programs and a professional staff, TR provides natural science education to children and adults on Long Island and beyond. Most programs are family friendly. **Call for fees and to reserve programs.** Unless listed, programs are at the Sanctuary. For more information: 516-922-3200
